## Full and scape Design Services

With scaled plan designs and 3D image altering, *Contour Landscaping* can make your dreams a reality.

## THE DESIGN PROCESS

PRE-CONSULTATION CONSIDERATIONS

CONSULTATION

It's important to have a budget in mind when considering your next landscape project. Having a budget allows the creation of a design to meet your needs while making the project financially feasible. Another consideration is that there is an initial fee at the time of the consultation. It is important to understand that the fee is for actual tangible designs that you can keep once you are satisfied with them. A typical design fee starts at only \$75.00

The initial consultation will allow you to express all of your ideas, problems, and other considerations for the project. Your input, together with the site considerations will be worked into the design. All necessary measurements will be taken to be able to provide a scaled plan drawing and all digital images will be taken for the 3D image design.

**DESIGN PLANS CREATED** 

PLAN DESIGNS/ 3D LANDSCAPE IMAGING

A CAD (computer aided design) plan will be created to display an overhead view of the area being designed. The plan design will be drawn to scale and display all existing structures and features of that area, but with the new landscape. The plan view allows the space to be understood for functionality and the relationship between all of the elements. With the aid of computer software a digital picture of the existing landscape can be transformed into how the landscape can look after installation. All of the new elements can be digitally added to the original picture. 3D image design is the best aid for truly understanding what the new landscape will look like when finished.

PRESENTATION OF DESIGNS

INSTALLATION

Once you're completely satisfied with the designs your new landscape can be scheduled for installation.

REVISIONS

If you're not satisfied with certain aspects of the design, revisions can easily be made and resubmitted for your approval.
